ABBE'S REFRACTOMETER**1394. Abbe's Refractometer :** The body of the instrument is fixed, having a leaning of 60°. Correct Refractive Index and Sugar percentage can be read directly in the field.

It consists of Abbe's Double Prisms with the Thermostat, Compensator, Telescope Mirror, Limb, Graduated Sector, Reading Magnifier & Radial Arm which carries Vernier. Abbe's Double prisms leaves a narrow space (about 0.1 mm) between the adjoining faces of the prisms. Compensator consists of the Amici prisms which serve for rendering the line of Ach, separation.
